

Creating marketplaces for business...

2010-2011

International Exhibitions and Conferences

Dear Colleagues,

On behalf of Kazakhstan Exhibitions Company Iteca and its International partner ITE Group Plc (UK), let us invite you to participate in Power Events, organised by our Companies.

Today, power sector is one of the most important driving forces of the world progress. Stable and reliable development of Kazakhstan's economy, investments into development and modernisation process of Kazakhstan's power sector gave us the possibility to organise three large international exhibition projects in power field.

We are glad to present for your attention the information on Events in power sector: Power Kazakhstan 2010, Kazatomexpo 2011, and Power & Lighting Astana 2011.

The above mentioned Events are officially supported by the government authorities, Kazakhstan National State Companies, professional Unions, Associations, and play an important role for the development of Kazakhstan's power sector. Annually, among the participants of our Events, we welcome the leading world companies, manufacturers and suppliers of the equipment, services and technologies for power sector.

Kazakhstan is of interest for international companies working in power and related industries. With a view of maintenance of stable and reliable energy supply of Kazakhstan, the Government has accurate vision of the development of the country's power sector: modernisation and construction of the new heating and power facilities; the development of the alternative energy sources; energy savings and energy efficiency development; the development of nuclear energy and construction of nuclear station by 2020.

For realisation of these goals, the Law on using of alternative energy sources was adopted in 2009; the Law on power saving is under consideration of Parliament; research for construction of nuclear station is conducted. Also, for stimulation of investments in power sector the Government of Kazakhstan accepted the programme on increasing the prices for electric energy till 2015. Due to this Programme 36 investment contracts were signed in 2009.

Iteca's Power Events undoubtedly enhance international cooperation between specialists working in energy sector, and contribute in addressing major issues faced by the Kazakhstan power sector.

On behalf of Kazakhstan Exhibitions Company Iteca and its International partner ITE Group Plc, we will be pleased to welcome you to Kazakhstan during our Events.

Yuri Borodikhin
Iteca Executive Director

9th Kazakhstan International Power & Lighting Exhibition and Forum of Power Engineers

**2-4 November 2010
Almaty, Kazakhstan**

The Kazakhstan economy is one of the most rapidly growing economies in the Central Asia offering the international community a variety of world-class and cutting-edge products and services. According to Ministry of Innovation and New Technologies, Kazakhstan's power generation will increase a demanding 30 per cent before the year 2015. Present time, in Kazakhstan the ageing of Kazakhstan's generating equipment are 70 per cent, electrical network – 65 per cent, heat network – 80 per cent.

Responding to this growth and vitality in the Central Asia, taking into consideration the necessity of modernization and installation of new equipment, and following the huge success of the event over the past 8 years, the Power Kazakhstan Exhibition and Forum of Power Engineers will be held in Almaty, Kazakhstan on 2-4 November 2010. Power Kazakhstan 2010 will be co-hosted by the Ministry of Innovation and New Technologies of the Republic of Kazakhstan; Kazakhstan Electricity Grid Operating Company – KEGOC; Almaty City Administration; Kazakhstan Electricity Association – KEA; Kazakhstan Union of Power Engineers, and Union of Kazakhstan Engineering Companies.

Power Kazakhstan provides an annual forum where industry leaders can address technical issues; introduce pioneering technology and share lessons learned about the region's power generation, transmission & distribution industries.

If you are involved in power industry and are looking to increase your business in the Region, don't miss this unique opportunity to stay ahead of the competition, update your knowledge and skills and see the latest industry developments.

The Ministry of Trade of Czech Republic will finance the participation of Czech companies at Power Kazakhstan 2010 Exhibition. The Federal Ministry of Economics and Technology and the Association of the German Trade Fair Industry (AUMA) are officially supporting the participation of German group at Power Kazakhstan 2010 Exhibition.

2nd Kazakhstan International Nuclear Power & Nuclear Industry Exhibition and Conference

29-31 March 2011
Astana, Kazakhstan

Kazakhstan is the world's leading nation in terms of proven reserves of uranium, with 21% of their total quantity concentrated in its subsurface. Natural uranium is mined by the environmentally safe and cost-effective in-situ leaching method. Kazakhstan can potentially become one of the key players in the world nuclear market possessing considerable reserves of natural uranium and nuclear fuel components production.

In 2009 Kazakhstan came out on top in uranium mining in the world, having produced about 14,000 tonnes of uranium. In 2010, plans are in place to increase uranium production in Kazakhstan up to 18,000 tons. At the same time, the country will take the leading position in the world in uranium mining in the period of the maximum demand for it.

The Government of Kazakhstan has plans to create fully vertically-integrated complex of nuclear fuel cycle facilities. As of today, there are two process stages in Kazakhstan: uranium mining and production of powders and fuel pellets. Work is in progress for adding up all such missing links in the nuclear fuel cycle as the uranium conversion and enrichment, and the production of fuel assemblies.

Kazakhstan has also realistic plans for the development of nuclear energy. In co-operation with the world leading nuclear industry companies, Kazakhstan intends to engage 16% of the global conversion capacity by 2020. The Government of Kazakhstan plans to put into operation at least one nuclear power plant in the territory of the country before 2020, to which end preparatory work is already underway.

Responding to these facts and big potential for the development of nuclear power and industry in Kazakhstan and following the huge success of the first Event, the Kazatomexpo Exhibition and Conference will be held in Astana, Kazakhstan on 29-31 March 2011. Kazatomexpo 2011 will be co-hosted by the Ministry of Innovation and New Technologies of the Republic of Kazakhstan; Kazakhstan National Atomic Company – KAZATOMPROM, Kazakhstan Electricity Grid Operating Company – KEGOC, and Kazakhstan Electricity Association – KEA.

Kazatomexpo Event provides an annual forum where industry leaders can address technical issues; introduce pioneering technology and share lessons learned about the region's Nuclear Power and Nuclear Industry.

If you are involved in nuclear power and nuclear industry and are looking to increase your business in the Region, don't miss this unique opportunity to stay ahead of the competition, update your knowledge and skills and see the latest industry developments.

1st Kazakhstan International Power & Lighting Exhibition

29-31 March 2011
Astana, Kazakhstan

Since 1998, when Astana became the national capital, the city is a leader among all regions in the country in social and economic development rates, construction and infrastructure development and investment. In view of high construction rates in the capital, fast population growth, and increasing demand for heating and electrical facilities, the Government made a decision to prioritise the city's infrastructural development. Development of Astana as an engine of Kazakhstan's economic growth will involve different mechanisms to provide incentives for business and investment, including improvements of the supporting infrastructure from the budget funds. The goals will be met thanks to an effective economy, which requires investment in the sectors capable of becoming the source of the growing gross regional product. They include construction of new, and renovation and upgrade of existing enterprises. A total of 1,390.7 billion tenge will be invested in the real sector in the mid term.

Responding to these facts, big population growth in Astana, and following the many requests of Iteca Company exhibitions participants, the Power & Lighting Astana Exhibition will be held for the first time in Astana, Kazakhstan on 29-31 March 2011. Power & Lighting Astana 2011 will be co-hosted by the Ministry of Innovation and New Technologies of the Republic of Kazakhstan; - Kazakhstan Electricity Grid Operating Company – KEGOC, and Kazakhstan Electricity Association – KEA. Power & Lighting Astana Event is the continuation of Power Kazakhstan Exhibition and Forum of Power Engineers - the leading event in electro technical area in Central Asia, successfully held every autumn in Almaty.

Power & Lighting Astana provides an annual forum where industry leaders can address technical issues; introduce pioneering technology and share lessons learned about the region's power generation, transmission & distribution industries.

If you are involved in power industry and are looking to increase your business in the region, don't miss this unique opportunity to stay ahead of the competition, update your knowledge and skills and see the latest industry developments.
